Basic Dolphin Anatomy

- Melon
- Beak
- Blownhole
- Dorsal Fin
- Flipper
- Fluke

Dolphins help them swim better. Their tail helps them go fast and their dorsal fin helps them swim straight.

Adapted from the original text, *Dolphins*, written by Becky Baines
Little dolphins can swim when they are born.

Adapted from the original text, *Dolphins*, written by Becky Baines
Big dolphins have blubber to keep them warm.

Little dolphins do not.
Adapted from the original text, *Dolphins*, written by Becky Baines

little dolphins can talk right after being born.
At 6 years old, a dolphin becomes an adult.
Dolphins like to play. They ride waves and blow bubbles.

Adapted from the original text, *Dolphins*, written by Becky Baines
Dolphins play games in the moonlight. When it's bedtime, they sleep.
