Joining a Meeting Space Meeting Near You
By Scott Badger

In Vista, Windows Meeting Space is installed automatically for you. You can join an existing Meeting Space meeting as long as you have access to the internet.

1. Start Windows Meeting Space.

2. Click Join a meeting near me.

3. If there are any Meeting Space meetings that are running near you, you will see them listed out in the right side of the Windows Meeting Space dialog box.

4. Click the meeting that you want to join.
5. Enter in a meeting password.
6. Click the green circle.

7. You’ve been added to the existing Windows Meeting Space meeting.
