Hiding Your Course from the Course List
By Scott Badger

You can hide a course(s) from showing up in your Course List. This was something that you could not do in WebCT 4.1.

1. Log into your Blackboard 9 account.

2. Click the Manage Course List Module Setting icon.
3. In the Display Course Name column, click the checkbox associated with the course that you
don't want to display in your course list including courses in which you’re enrolled in.
4. Click Submit.

5. Notice that the course(s) are no longer being displayed in your course list. (In this guide, we are
no longer showing Experimental_Badger_10 course.)
