How to Install the previous version of Java

1. First you need to uninstall the current version of Java

2. Click the Start Menu > Control Panel
3. Click on Programs and Features

4. Scroll down and select Java 7 Update 51 and then click the Uninstall button.

5. Close the Control Panel window.
6. Click the Start Menu and then right-click Computer and select Properties.

7. Look at the System type and take note if your system is a 64-bit or 32-bit Operating System.

8. Close out the window.

9. Click on the appreciate link based on your computer’s Operating System type
   - [http://faculty2.ric.edu/sbadger/java/jre-7u45-windows-i586.exe](http://faculty2.ric.edu/sbadger/java/jre-7u45-windows-i586.exe) -- 32-bit
   - [http://faculty2.ric.edu/sbadger/java/jre-7u45-windows-x64.exe](http://faculty2.ric.edu/sbadger/java/jre-7u45-windows-x64.exe) -- 64-bit
10. Click Run.

11. Click Install
When Java updates are available, you will be prompted to download and install. We recommend you always do so to ensure your system has the latest performance and security improvements.

See the instructions if you want to change this behavior.

When you click close, your browser will be opened so you can verify that Java is working.

12. Click Close

Verify Java Version

Check to ensure that you have the recommended version of Java installed for your operating system. After clicking the button below, a security prompt may appear. Click Run to allow the verification process to continue.

If you recently completed your Java software installation, you may need to restart your browser (close all browser windows and re-open) before verifying your Java version.

13. If you are asked to install the newest version, click on later.
14. Click on Run
Verifying Java Version

A newer version of Java is available

Please click the download button to get the recommended Java for your computer.

Your Java version: Version 7 Update 45

If you recently completed your Java software installation, you may need to restart your browser (close all browser windows and re-open) before verifying your Java version.
