Recording the Screen in Camtasia
By Andrew Larrivee

1. Select your microphone and “no camera” to record from the screen.

2. Click the “record” button to start.

3. Camtasia will prompt you with a 3-second countdown. After this, Camtasia is recording your screen. Speak into your microphone to narrate the clip as it is recording.

4. To stop recording, click the red filmstrip icon and then click “Stop Recording,” or press the keyboard shortcut SHIFT+COMMAND+2.
5. The Camtasia editor will open after recording and the clip will automatically be added to the media tab and the timeline.
