SETTING UP THE ELMO TT-02S DOCUMENT CAMERA

By Pat Hetu

1. Connect the room projector to the document camera by plugging the computer extension (VGA) cable to the camera via the RGB output port (located on the back of the document camera.)

2.Bring the camera head up by positioning the gooseneck until the camera head is over the image to be projected.
3. To turn the camera on, press the **power button**.
4. To zoom in or out, turn the Zoom Dial clockwise (to zoom in) or counterclockwise (to zoom out).

5. To focus automatically, click the red Auto Focus button.
6. To adjust and/or work with the screen display, push the Menu button.

7. The menu appears on the screen. Use the arrow keys on the shuttle wheel to move through the various Menu options.
