USING THE AVERMEDIA SPC300 DOCUMENT CAMERA

By Pat Hetu

1. Connect the room projector to the document camera by plugging the computer extension (VGA) cable to the camera via the RGB output port (located on the back of the document camera.) Connect the Power Adapter into the DC 12V Input. Plug the other end of the adapter into a power source.
2. Carefully position the document camera neck until it is over the image to be projected.

3. Push the Power Button (located in the base of the unit) to turn on the document camera.
4. The image of the chosen item is projected on the screen.

5. Push the **AF (Auto Focus)** button to bring the item into focus. To zoom in, turn the **Shuttle Wheel** clockwise; turn the shuttle wheel counter clockwise to zoom out.
