Creating a Wiki Page Library
By Scott Badger

2. Click the SharePoint Content tab and then click Wiki Page Library.

3. Under Options, name the new document library. (Note: For this example, we named it WikiPages.)
4. In the Folder List, right-click the new document library (i.e. WikiPages) and then click Properties.

5. In the Settings tab, enter in a name.

6. Turn on “Require content approval for submitted items”.
7. Under Use version history, select Major and minor (draft) versions.

8. Click Apply.

9. Click the Supporting Files tab.

11. Click OK.

12. In the Folder List, right-click Lists and select New > SharePoint Content.
13. Under Options, name the new list.

14. Click OK.

15. The new list displays below the List folder.
Microsoft Office SharePoint Designer
