Creating a Hyperlink to Your New ASP.NET Page
By Scott Badger

1. In Designer 2007, open the default.aspx page.

2. Open your Toolbox Task pane.

3. Drag the Paragraph component to the default page.

4. As P tag placeholder is inserted in the page.
5. In the paragraph element, enter desired text. (Note: For this example, we have entered “Click here to checkout information about the Parcel Deliveries”.)

6. (Optional Step) Highlight text and then from the font drop down menu select x-small (10 pt).

7. Open the page to hyperlink to. (Note: In this example, ParcelDelivery.aspx was opened.)

8. Press F12 to preview this page in your default browser.
9. From the address bar, copy the URL for this page.

10. Highlight the word “here” and then click the **Insert Hyperlink** button located on the Common Toolbar. (or click Ctrl+K)
11. Paste to copy the URL.

12. Click the Target Frame button.

13. Leave the Target Frame at Page Default (none).

14. Click OK.
15. Notice that the word “here” has changed color and is underlined. This is an indication that a hyperlink is associates with the word.

17. Press F12 to preview your page in your default browser.

18. Click on the hyperlink to test it out.

19. In the top left of the screen, click the breadcrumb link to return to the main page of the SharePoint site.
