

# How to Connect Your Apple Device to the Projector using the Sharelink Source?

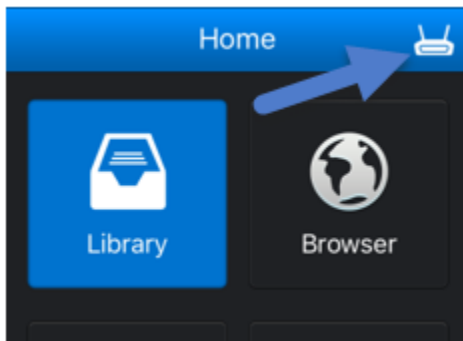

By Scott Badger

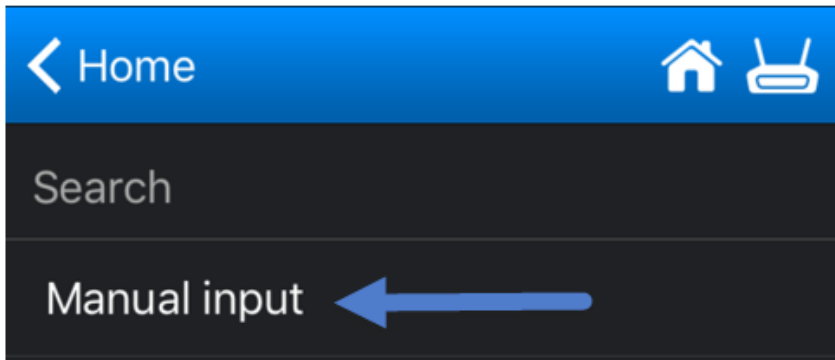

1. On the Extron panel, press the “Laptop” button and then press “SHARELINK”.

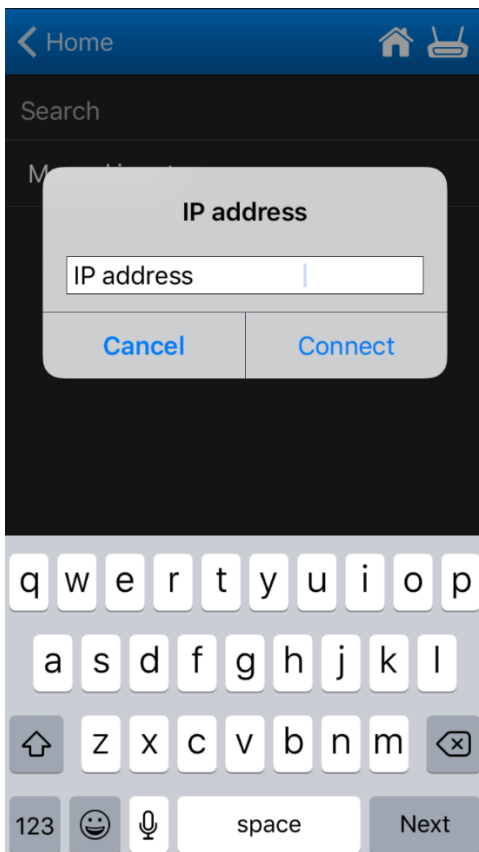

2. Press the Extron SharaLink MirrorOp app.

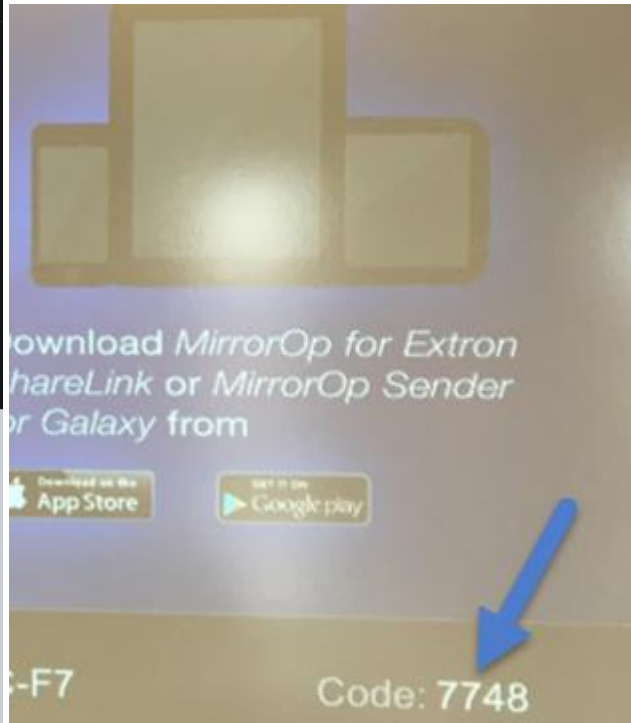

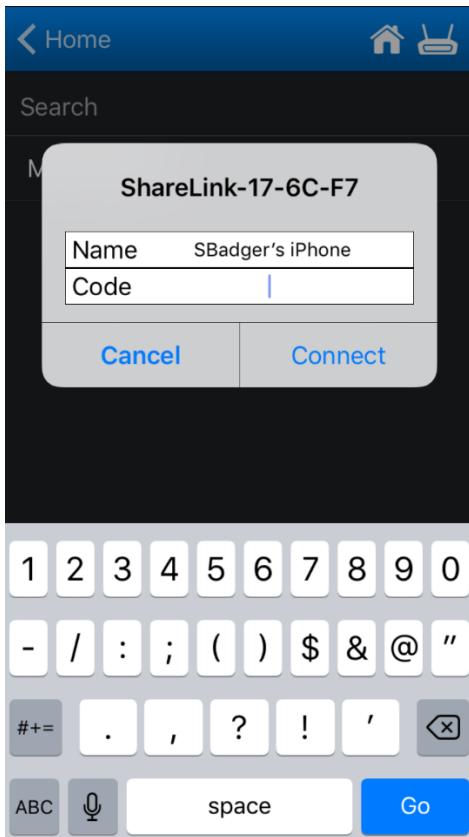

3. Press the connection button.

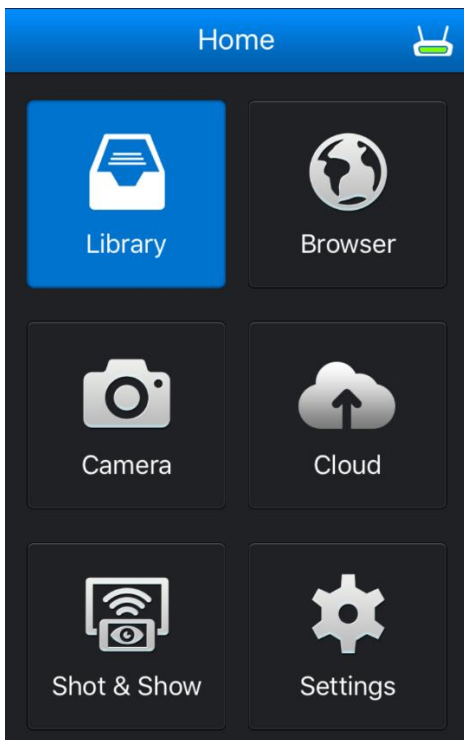

4. Press "Manual input".

5. Enter in the project's IP Address, located at the bottom left hand corner on the projector image.

6. Enter in the code which is located at the bottom right hand corner of the projected image.

7. Your device is not connected to the projector. You can now select the content to display.
