

How to Connect Your Laptop Wirelessly to the Projector?

By Scott Badger

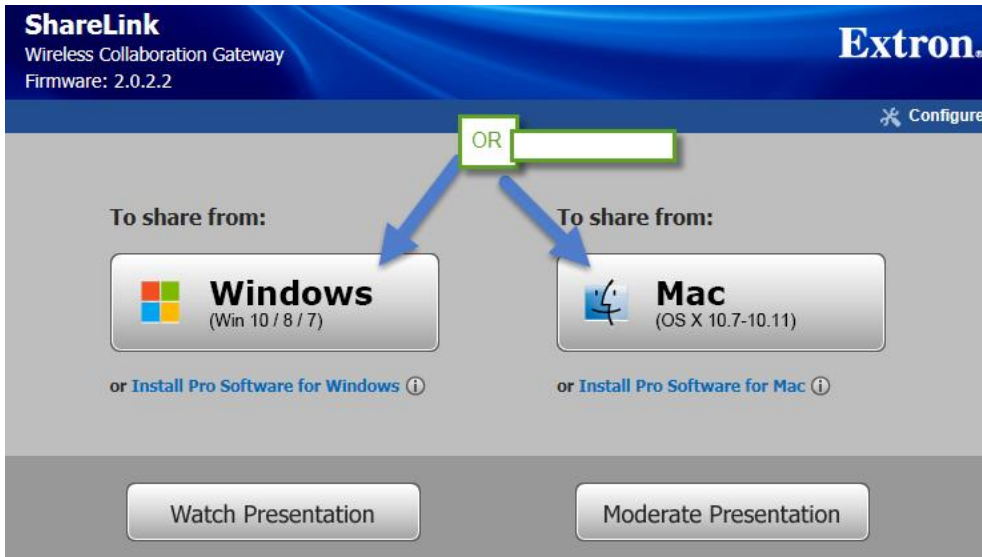

1. Open a browser on your laptop.

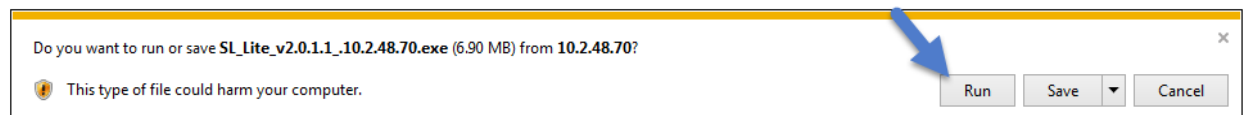

1. On the Extron panel, press the "Laptop" button and then press "SHARELINK".

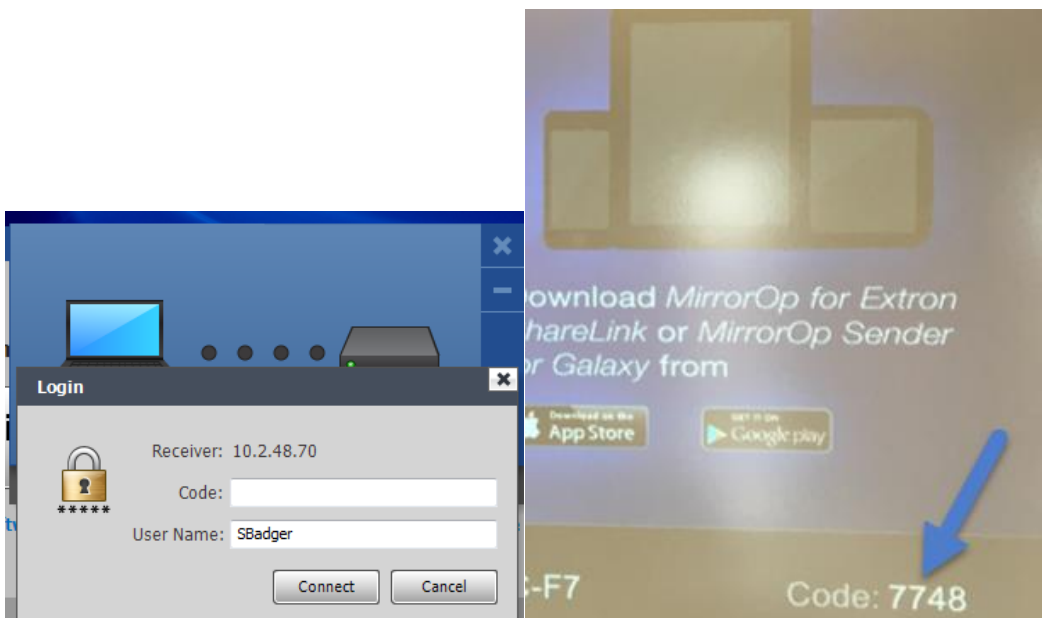

2. Enter the IP address into your web browser which is located at the bottom left hand corner on the image.

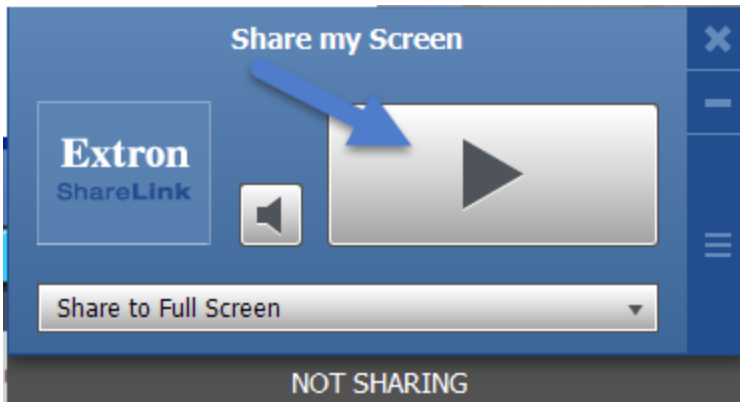

3. Click on either the “Windows” or “Mac” button.

4. Click “Run”.

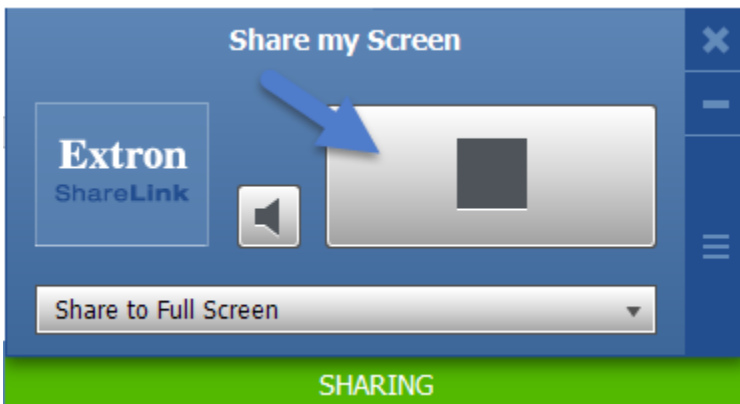

2. Enter in the code which is located at the bottom right hand corner of the projected image.

3. Click Play button.
4. Now you will see your laptop image being displayed up on the projector.

5. When you are done displaying your laptop wirelessly, click the Extron icon in the task bar.

6. Click the Stop button.
7. Then click "Exit".
